

**ATLANTIC
DETROIT DIESEL-ALLISON**

ADDA NEWS UPDATE

AtlanticDDA has been selected to represent Cataclean as an exclusive dealer within our AOR.

Introducing

CATACLEAN[®] LIKE NOTHING ELSE

Reduces harmful carbon build-up which leads to lost power, poor fuel economy and failed emissions.

Things you should know about Cataclean:

CATACLEAN is NOT a fuel additive, and it is not added to fuel as a gasoline or diesel "enhancement."

CATACLEAN is an engine and fuel system detoxification technology, developed to exceed the most recent environmental standards.

CATACLEAN rapidly and thoroughly dissolves resin, gum, carbon and similar deposits in the fuel system and catalytic converter.

CATACLEAN not only prevents fouling of your catalytic converter, it removes existing deposits and increases fuel efficiency.

CATACLEAN only uses third party, independent laboratory testing to substantiate product claims.

CATACLEAN works to clean the fuel system, valves, pistons and catalytic converter, thereby increasing fuel efficiency and reducing emissions, ensuring optimal engine performance.

CATACLEAN has been scientifically proven in both laboratory and expert field testing to reduce emissions by up to 60%.

We're proud to welcome Cataclean to our family of excellent products that we offer our valued customers!

For more information or to order Cataclean call your local service center:

"This represents a genuine opportunity to garages in terms of gaining good will with customers by saving money on parts"
– *Commercial Vehicle Workshop Magazine*

"The test results are in, and early indications show that Erie County vehicles run cleaner and greener with a product from an Orchard Park company in their gas tanks."
